

Introducing... Mrs. Hall

Why are you a teacher at Days Creek?

I love teaching. There is something about the moment you see a student really grasping a concept. That "ahh-ha" moment when you can see the student making neural connections. I love being a part of that. Knowing that I can make a difference in the lives of others that will last them their whole lives. At Days Creek, there is such a great family environment where everyone cares for each other in a way that I've not experienced in bigger schools. It's a very special

Where did you go to college? What was your major? Why did you choose that major? What are your certifications?

I went to college at the University of Kansas and the University of Colorado. As an undergraduate in Kansas I majored in Biology. As a graduate student in Colorado I majored in Biomedical Sciences. I choose those majors because I've always been fascinated with science and what makes things work in our bodies, what causes disease, and how we can stay healthy. I am certified to teach Biological sciences, Advanced Mathematics, and will be adding CTE health science.

What is the funniest thing that happened while teaching Distance Learning?

Before class one day, I had a student playing some rap music. I was getting ready for class, so I turned the sound down so I could concentrate. Then when I started class, I forgot to turn the sound back up. So although the students could hear me, I could not hear them. I was trying to ask them questions and not hearing any response. I kept saying, "You are being so quiet today!" Finally, I figured out that they were just not being heard and I turned the sound back up. Haha. It was pretty funny. :)

What is your greatest advice to Students? Parents?

Use your time wisely because it goes by fast. Everyday is an opportunity to learn something new.

What is your hidden talent?

I know a lot about natural health and preventative measures for staying healthy naturally.
