

Introducing... Mrs. Reed

Why are you a teacher at Days Creek?

I am a teacher at Days Creek because I love the students, staff, and communities that we serve at Days Creek. We are small enough that we can really get to know our students. I have loved being able to have my students over multiple years and getting to watch them as they progress through to the 12th grade. You don't often get that experience in other districts.

Where did you go to college? What was your major? Why did you choose that major? What are your certifications?

I went to Southern Oregon State College (now SOU) in Ashland. My major was Elementary Education. My desire to become a teacher started way back in first grade when I had Mrs. Paetz for a teacher. I ultimately chose education because of my love for school and learning. I wanted to share my love for education with children and help them become the people they are meant to be. I have a Bachelor of Science degree in Elementary Education. I also have basic endorsements in reading and education media (library).

What is the funniest thing that happened while teaching Distance Learning?

The funniest thing probably was finding out after many takes making a video lesson that I did not have sound. Then it took me several more takes before I decided I could post the video. It didn't feel funny at the time, but later on I delighted in telling the story to others. From then on I learned to check the sound before starting to video a lesson.

What is your greatest advice to Students? Parents?

My greatest advice to students is that reading will take you far in life and help you with your learning in all subject areas. My greatest advice to both students and parents is that we all learn at different rates. It is important not to compare our learning to other students/siblings because we all learn in our own time and at our own speed.

What is your hidden talent?

My hidden talent is probably that I can write in calligraphy.
